Aerial Work Platforms

There are many attachments utilized for lift trucks which can be used to be able to help expand the capabilities of your forklift and allow you to pick up items, handle materials with less effort or to accomplish clean-up jobs.

Several accessories were particularly designed for the blades themselves. For instance, blade extensions can be used if you require more blade length, which increases lifting capacity. Fork extensions come in lengths ranging from 48-120 inches. Rounded or triangular accessories are another type utilized if moving rolled material in order to make sure it does not roll off of the traditional flat forks.

Examples of lifting accessories comprise pivoting and telescoping crane or boom accessories. They could come in quite a few various kinds and are most often meant for moving poles, metal bars, lumber and different kinds of bulky things. Other accessories like various kinds of hook plates and hooks are available to be able to lift stuff utilizing a sling or chain. Magnetic lifters and slab lifters are other objects that could be utilized together with hook attachments. Slab lifters are specialized accessories which are utilized for lifting a variety of materials that are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools that connect to your lift truck in order to make transferring rolls of carpet much easier. The attachment connects onto the forklift's forks and has a pole that goes through the middle of the carpet roll.

There are several types of forklift attachment used for facility maintenance like for example snow blades. These industrial blades could be attached to front end loaders and utilized for transporting materials like for example snow, dirt as well as mulch. Other popular cleanup accessories comprise magnetic sweepers and standard sweepers. Standard sweepers consist of a broom that the forklift blades connect onto for sweeping large spaces such as parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal debris like on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up effortless and fast.

A material spreader is another lift truck attachment that is usually utilized at facilities. These spreaders are helpful for a range of applications like for example spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Another optional lifting attachment are work platforms. These can be used by many various businesses daily. Platforms may differ in size from 36" x 36" to up to 60" x 60". Some units may be obtainable and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location with the use of the lift truck. Larger platform models have additional space for personnel to be able to carry tools and other essential stuff meant for the task. Often work platforms are constructed of steel or ploy material.
