

Quick Attach Work Platforms

Attaching fast to the lift truck, useful lift truck work platforms, by putting in blades into fork pockets and chaining platform to the forklift. This attachment could securely and safely transport maintenance personnel. The fork lock or tine needs to be engaged in order to secure the platform to the forks properly. This particular accessory comprises a checker floor plate platform and a long strap with hook so as to securely attach the platform to the fork truck. These work platforms are constructed of welded steel and powder coated using a blue finish. They have a hoisting capacity of 1000 lbs.
